

## Software Release Notes

### Software Information

Product:	<i>Supports all UK Euro Control panels &amp; Enforcer Panels</i>
New version number:	<i>Version 11.0m</i>
Replaces version number:	<i>Version 10.5g</i>
Installation file:	<i>InSite UK Access 11.0m.exe</i>
Date released:	<i>15th March 2021</i>
Reasons for update:	<i>To add Enforcer M4 v11.01 Panel</i>

### Release Notes

*InSite v11.0m is being updated to add new panel type Enforcer M4 v11.01.*

### Pre-Installation

If you use 'Insite Download Path', want to keep it's setting and have V10.3d installed:

Go to current InSite install directory, default:

C:\Program Files (x86)\Insite2002

Or

C:\Program Files\Insite2002

Overwrite (copy and replace) the supplied NonNmSQL.txt

### Installation Instructions

Download InSite.

Follow the installation wizard to install. **Notes:**

1. If you are an existing user, please make a copy of your database before you install.
2. If you are updating, make sure you close any instances of the software, as this could corrupt the database.
3. If you are an existing user, it will import your existing database into the new version of InSite, automatically during the process.

### Post Installation Instructions

*Once this version of 11.0m InSite has been installed, it is mandatory that when this InSite makes a connection to any panels older than version 10, this InSite MUST do a data from panel, before ANY data is sent back to the control panel.*
